Internship Evaluation - 2025

Solution: Trigonometry Problem 1 (Template 1)

Solution: Trigonometry Problem 2 (Template 1)

Solution: Compound Interest Problem 1 (Template 2)

Solution: Compound Interest Problem 2

Compound Interest Problem 2

127.0.0.1:3000/coco.html?serverWindowId=a54fca93-2b5d-4287-91bb-f2abbc1ca8b9

→ $10000 = \left[1 + \frac{10}{100} \right]^3 = 13310$

→ $\left[1 + \frac{10}{100} \right]^3 = \frac{1331}{1000}$

→ $\left[1 + \frac{10}{100} \right] = \frac{11}{10}$

A = ₹13310

Interest Compounded Annually

10000 → 3 → 13310

years

Amount of ₹10000 in 3 years at 10% p.a. compound interest

$11^3 = 1331$
 $10^3 = 1000$
